HYDRO EXCAVATING

- ✓ Using the latest technology IRE utilizes its fleet of hydro excavating trucks and trailers by exposing utilities with high pressure water and vacuum reducing the chance to damage underground utilities and services.
- ✓ Standard Excavation
- ✓ Utility locating
- ✓ Jet Rod Cleaning
- ✓ Remote Digs
- ✓ Storm Drain cleanout
- ✓ Bore Mud removal
- ✓ Manhole/Valve Box cleanout
- ✓ Retention pond clean out
- ✓ Meter box cleaning
- ✓ Main Break Clean ups

WATER DISTRIBUTION

- ✓ Main Installation/Repair
- ✓ Water service Installation/Repair
- ✓ Hydrant Installation/Repair
- ✓ Kobus Pipe pulling Machine
 - ✓ Pulling Lead, Copper, and Metal Service Lines

SANITARY/STORM SEWER

- ✓ Gravity Sewer Main Installation/Repair
- ✓ Sewer Lateral Installation/Repair
- ✓ Manhole installation
- ✓ Inlet Installation/Repair

DIRECTIONAL BORING

- ✓ Directional Boring goes above and beyond traditional trenching; connecting utilities and services in places that traditional trenching is impossible. It can be used to go under roads, sidewalks, rivers, even houses if there is a need for it. IRE uses one of the most modern of boring machines, the Vermeer DX-24x40 Series II capable of boring a line ranging from 3/4" thickness to 16" thickness and can bore up to 500 foot sections at a time. While using its fleet of hydro excavation equipment to spot and verify locations of existing utilities to promote a safe and efficient work environment.

RESTORATION

- ✓ IRE's first projects were doing small dirt restorations around the water hydrants throughout the City of Indianapolis for the Indianapolis Water Company. We now do storm, drainage and sewer system repairs and installs along with full restorations from start to finish. Taking pride in every project whether small or large.
- ✓ Concrete Sidewalk, Driveway, Curb, ADA Ramps, Streets, Stairs, Headwalls, etc.

CASTING ADJUSTMENTS

- ✓ Indiana Reclamation and Excavating is a Certified installer of the Mr. Manhole leveling system. The Mr. Manhole system will dry cut through asphalt or concrete and remove a manhole casting from the street. The Mr. Manhole system also rebuilds and seals the chimney section of the manhole perfectly level with the slope of the road. With new Casting set and then a concrete collar poured.
- ✓ Sanitary Manholes
- ✓ Storm Manholes
- ✓ Communication
- ✓ Water Valve
 - ✓ Service Valves
 - ✓ Main Line Valves
 - ✓ Water Vaults
- ✓ Gas Valves

MANHOLE REHABILITATION

- ✓ Rehab instead of replacement of structures can be more cost efficient. Strong Seal is a fast & effective solution for stopping infiltration, restoring structural integrity and stop chimney sections from leaking causing sanitary overflow problems, and removes the bump from unlevel manholes. The Strong Seal system adds structural integrity, stops infiltration of water, protects against corrosion, is safe to use and will not cause back up, and seals the entire structure from casting to benchwalls.
 - ✓ MH Rehab services
 - ✓ Vertical sealing of MH
 - ✓ Casting Adjustment Paved or unpaved
 - ✓ Grouting of voids and joints
 - ✓ Benchwall reconstruction
 - ✓ Chimney Reconstruction

DRAINAGE

- ✓ IRE is experienced with both commercial and municipal storm drainage issues.
 - ✓ Open Ditching
 - ✓ Driveway pipes
 - ✓ Crosspipes
 - ✓ Rip Rap Erosion Control
 - ✓ Bank Stabilization

LEVEE MAINTENANCE

- ✓ Indiana Reclamation & Excavating, Inc. partnered with United Water of Indianapolis to complete various levee maintenance and restoration projects.
